

EU Accession - Financial Sector Opportunities and Challenges for Southeast Europe

A distinguished international group of central bankers, commercial bankers, entrepreneurs, academic advisors, policymakers, and representatives of development finance organizations and donor agencies, brought together by KfW, examines in this book the future of financial sector development in Southeast Europe. They explore ways to strengthen the banking sector in Southeast Europe, further promote SMEs, and improve access to financial services in the region. Experts and decision-makers assess the opportunities and challenges presented by the EU accession process and Basel II, and offer candid insight into the expanding role of the private sector in developing the financial landscape. The perspectives presented in this book will prompt discussion and intellectual exchange that will serve as a new starting point for further successful cooperative initiatives.
