

Living Your Successful Life: A Metaphysical Journey to Finding Your Truth

The book *Living Your Successful Life* is a metaphysical journey to finding your truth. You deserve to know the truth! The truth will set you free but first it will piss out off! ~Gloria Steinem Gloria Steinem authored this saying and I realized this truth myself. The big aha moment came when I got the information that I was the only one in charge of my reality! Yup, Real people like you and I can create the life that we have always wanted, by learning how to take control of our world through education and conscious living. I have learned that this can be achieved by demystifying the laws of attraction, learning the philosophy behind metaphysics in plain English, and working with our Personal Team. The key to your successful life starts with making conscious balanced decisions, by knowing how the energy around you affects your life, and how you affect it in a positive way, by becoming self-empowered. This book has come about because I kept asking questions like; who am I, what is the meaning of life, and what is my purpose? I was on a mission to demystify the concepts of conscious living, the laws of attraction, and the philosophy of metaphysics. What finally came to me was unexpected and quite frankly blew my mind, and it was way different and much more than I ever expected. This information even makes me look like a heretic within the world of the New Age Industry. I say this because am not being received very well at all within the New Age community. Even though I have not been well received, I believe that these concepts and teachings have been around for many thousands of years, but kept behind closed doors. It is now time to open the doors to these secrets and let them be known to all. It is time to take back our power by tapping into our subconscious mind (the ego). By bringing this information into our conscious mind, so we can see it for what it is (a program)! Just start by asking yourself: Who am I inside

and out? How did I get to this point in my life? Moreover, what part of me was in charge of that? The fact that you are reading this tells me that you are at a crossroads, just like I was all those years ago, and you are ready to answer these questions yourself. You are ready to become the conscious programmer of your own mind. Are you ready to take control of your own self, so that you can start living your successful live?
